DON'T WALK ALONE, WE ARE HERE.

Hacknowledge

SECURITY
MADE SIMPLE

Your vendor neutral cybersecurity partner

hacknowledge.com

HACKNOWLEDGE is a cyber-security company offering various services to continuously protect your systems from unwanted intrusions.

Created by expert security engineers, our mission is to help your company anticipate, detect threats and react accordingly within a defined budget.

At Hacknowledge, we are:

LOCAL

Certified ISO27001 since day one, our offices are in Switzerland and Luxembourg and our engineers are all local (Swiss residents for Switzerland) with clean record: your data do not cross the borders.

VENDOR NEUTRAL

We do not resell any other products or services, we are vendor neutral. We will leverage your existing cyber security products and work within a defined budget.

A TRUSTED PARTNER

We build long-term relationships with companies of all sizes and industries through our innovative and "win win" transparent approach: our interests are aligned with yours.

AN EXTENSION OF YOUR TEAM

Our analysts will save you precious time by automating part of your security, and by contacting you only when necessary: your will have more time to focus on what really matters for your business.

VISION CYBER MANAGEMENT

Vision Cyber Management by Hacknowledge is a **fully integrated enterprise-level Managed Detection and Response (MDR) service** combining the value of your logs with our cutting-edge custom sensors, allowing our security experts to better identify the threats targeting your organization.

TECHNOLOGY

FULL MANAGED SERVICE

Hardware and software setup, configuration, maintenance, updates, adapted to your needs in a completely transparent way.

MANAGED SIEM

Full access to your data, with the possibility to use opensource technology or your existing Splunk / Azure Sentinel SIEM.

SENSORS

Custom sensors developed to provide visibility to your network, and reduce false positives, combining security features such as IDS, vulnerability scanning, honeypot, file analysis...

ADDITIONAL FEATURES

We provide access to many other features available from our customer portal, such as canaries, sandbox, pentesting, phishing test, security awareness, threat intelligence, incident response, and more...

EXPERTS

24X7 MONITORING

Our security experts simplify your life by filtering only the alerts that truly require your attention, reducing alerts from 20+ per day to a few per month.

DEDICATED SENIOR TAM

Your dedicated Technical Account Manager will present you a monthly security report including executive summary, identified problems over the past period, a summary of your security posture and personalized recommendations.

YEARLY PROFESSIONAL ADVICE

We are at your disposal to help you make the right decisions, handle alerts, work on new use cases, or any other request from you regarding your IT security.

Our technology and experts are all included in a unique and predictable all-in-one package:

VISION CYBER MANAGEMENT by Hacknowledge.

Independently, or in addition to our all-inclusive VISION Cyber Management solution, we also offer a variety of services, including:

CONSULTING

Focusing on fulfilling our client's needs and helping them solve their issues

- **Splunk® technologies:** Our team of Splunk Core Certified Consultants is at your disposal to help you with Design, Architecture, Log Management, Migrations, Optimization, Custom Apps and Add-ons development, Advanced Dashboarding, Integration to our MDR service and Trainings.

- **Microsoft® Azure Sentinel:** We can help you manage the deployment, configuration and the tuning of Azure Sentinel. Microsoft Azure Sentinel can be integrated with our MDR solution to provide a 24×7 Monitoring service with our experts security analysts.

- We are able to perform **Purple teaming, Incident response, Security audits, Advanced analytics** across companies of all sectors and sizes.

OFFENSIVE SECURITY

To anticipate Threats, and proactively protect your computer systems, networks and individuals from attacks

- **Penetration Test:** Hacknowledge experts will execute real-life based attack scenarios in order to bring value to our customers, allowing them to quickly remediate and significantly reduce their attack surface.

- Using **Blackbox / Greybox / Whitebox approaches** or several combined, Hacknowledge proposes a panel of different penetration tests to cover your whole infrastructure such as Web application, External, Remote Access, Internal, WIFI, Physical, Phishing campaigns as well as Adversary Simulation and Red Team engagements.

CSIRT: INCIDENT RESPONSE

In the event of a proven attack, you can count on our Incident Response Team to assist you in quickly identifying and containing the discovered threat.

- **Incident Preparation:** Our experts from the CSIRT team will help you get ready

- **Forensic Analysis:** Analysts at Hacknowledge can collect digital evidences with state of the art techniques ensuring the continuity of the chain of custody for legal procedure.

- **Cyber Crisis Management Support, Purple Teaming Collaborative Testing** and much more.

TRAINING: THE HACKADEMY

Upgrade your skills with our trainings taught by industry experts and guaranteed to provide the most extensive, affordable and practical hands-on training experience.

- With our **wide variety of courses** and a **team of instructors**, we make learning interesting, affordable and fun.
